Dudley Adult Mental Health and Wellbeing Needs Assessment: Public Engagement

Emily Smith

Public Health, Dudley Council

Update on progress

- Dudley Adult Mental Health and Wellbeing Needs Assessment:

- Looks at the mental health needs of the whole adult population of Dudley, not a single group or individual.
- Looks at needs from lots of different angles, including data, public views and partner organisations' views.

- Public engagement work completed: many thanks to all who participated

What you told us: what works well

- Lots of examples of good care received from individual healthcare staff
- Integrated Plus
- Having regular reviews with your GP
- Peer support groups

What you told us: what could work better

- People can wait a long time for treatment
- Sometimes difficult to access support in a crisis
- Not enough focus on helping prevent problems from happening in the first place (across the spectrum)

What you told us: what could work better

- People can wait a long time for treatment
- Sometimes difficult to access support in a crisis
- Not enough focus on helping prevent problems from happening in the first place (across the spectrum)

What you told us: how we could make things better

- More joined-up working between different services
- Recognising the links between mental and physical health
- Greater access to talking therapies
- Improve training for all healthcare staff on mental health

Next steps

- Use the Needs Assessment to develop a borough-wide mental health strategy

Commissioning Intentions

2018/19 – 2019/2020

Our Context

- More people requiring emergency services
- More people requiring hospital care
- More people requiring healthcare in general
- Fewer Doctors working in Primary Care
- Largely disjointed community services

What we are doing

- MCP Procurement
- Establishing an Accountable Care Organisation (ACO) (Community and Acute)
- Black Country Sustainability & Transformation Partnerships (STP)
 - Joint Committee
- Working towards an Accountable Care System (ACS)

Meanwhile...

Deliver year 2 of Operational Plan:

- Financial efficiency and sustainability
- Primary Care efficiency and sustainability
- Urgent & Emergency Care Standards
- Efficient Elective Care

Continue to deliver the Operational Plan:

- Cancer care standards
- Mental Health
- Learning Disabilities

Maximising on efficiency

- Quality, Innovation, Productivity and Prevention programme (QIPP)
- Decommissioning

Questions

Activity

Using the pre-prepared sheets discuss the following....

1. Do the current commissioning intentions fulfil patient needs?
2. Are there any areas you feel may require commissioning or decommissioning?
3. Is there anything you feel would affect you personally and would you feel happy to share this?

Feet on the Street

James Cole

Specialist Placement and Recovery
Manager

The 70th birthday of the NHS

5th July 2018

Thank you for attending
